

WHY INVEST IN DYFI?

Dynamic

DYFI allocations are dynamically adjusted to effectively adapt in changing market conditions or interest rate regimes.

Differentiated

DYFI offers fixed income exposure, encompassing U.S. government bonds, corporate bonds, high yield bonds, bank loans, TIPS, and international bonds all in one ETF.

Data-Driven

Our transparent, risk-focused strategies are based on rigorous algorithms that harness big data for emotionless investment decisions.

FUND DETAILS

As of 03/31/2026

| | |
|------------------|------------------------------|
| Ticker | DYFI |
| Type | Active Fixed Income ETF |
| CUSIP | 26923N660 |
| Primary Exchange | NASDAQ |
| Inception Date | 01/10/2024 |
| Expense Ratio | 1.13% |
| Fund AUM | \$55.69M |
| Advisor | IDX Advisors, Llc. |
| Fund Distributor | Foreside Fund Services, Llc. |

HISTORICAL PRICES

Historical Price \$22.58 (-0.03%)

The line graph represents the cumulative performance of a share since inception. The returns are net of the ETF's expenses but do not reflect the payment of any brokerage commissions or brokerage costs incurred as a result of buying or selling fund shares and do not reflect the deduction of taxes to which an investor would be subject as a result of owning or selling shares of the fund. If they did, the returns would be lower than those shown.

FUND PERFORMANCE

Month-End Performance (as of 03/31/2026)

Quarter-end **Month-end**

| | YTD | 1 Months | 3 Months | 6 Months | 1 Year | Since Inception |
|-----|-------|----------|----------|----------|--------|-----------------|
| NAV | 0.96% | 0.68% | 1.27% | 2.25% | 4.12% | 1.54% |
| MKT | 0.93% | 0.67% | 1.25% | 2.20% | 4.09% | 1.54% |

The performance data quoted represents past performance and is no guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance, please call 844-456-4545 or visit the Fund's website at www.idxshares.com.

Market Price is the current price at which a good or service can be purchased or sold. **NAV "Net Asset Value" Price** is the net value of an investment fund's assets less its liabilities, divided by the number of shares outstanding.

FUND OBJECTIVE

The IDX Dynamic Fixed Income ETF's (the "Fund") investment objective is to seek high current income.

For the Fund's most recent month-end performance, please visit www.idxadvisors.com or call (844) 456-4545.

MARCH 2026 SUMMARY

The IDX Dynamic Fixed Income ETF (DYFI) returned +0.35% for the month ending March 31st, 2026. Performance was underpinned by a timely allocation to short-term US Treasury Bills; our early-month rotation helped deliver positive results even as broader fixed-income markets faced pressure.

Geopolitical tensions dominated the month as the US-Iran conflict and related oil-price spikes reignited inflation concerns and pushed Treasury yields higher. While risk assets remained resilient overall, rising rates and modest widening in credit spreads created headwinds for many fixed-income strategies. Our reduced high-yield exposure in favor of agency MBS, investment-grade credit, and Treasury Bills proved effective, mitigating volatility and allowing the Fund to outperform in a challenging environment.

We continue to monitor the evolving inflation and policy backdrop closely and maintain flexibility in our allocations.

Our strategy addresses the structural rise in correlations between risk assets and Treasuries, which has blunted the diversifying power of traditional government bonds within portfolios. By utilizing a tactical long/short framework driven by trend-following and momentum signals, DYFI aims to decouple from these converging asset classes, offering returns uncorrelated to both traditional equity and fixed-income products.

DISCLOSURE & DEFINITIONS

Investing involves risk, including potential loss of principal. Because the Fund is non-diversified, it may invest a relatively high percentage of its assets in a limited number of issuers. The Fund may actively and frequently trade all or a significant portion of the Fund's holdings. A high portfolio turnover rate increases transaction costs, which may increase the Fund's expenses. Frequent trading may also cause adverse tax consequences for investors in the Fund due to an increase in short-term capital gains. As a result, the Fund may experience increased volatility and be more susceptible to a single economic or regulatory occurrence affecting one or more of these issuers. The Fund's investments in derivatives may rise or fall in value more rapidly than other investments. Changes in the value of a derivative may not correlate perfectly, or at all, with the underlying asset, reference rate or index, and the Fund could lose more than the principal amount invested. Some derivatives can have the potential for unlimited losses. In addition, it may be difficult or impossible for the Fund to purchase or sell certain derivatives in sufficient amounts to achieve the desired level of exposure, which may result in a loss or may be costly to the Fund. The value of an investment in the Fund is based on the performance of the underlying funds in which the Fund invests and the allocation of its assets among those ETFs. The underlying ETFs may change their investment goals, policies or practices and there can be no assurance that the underlying ETFs will achieve their respective investment goals.

The underlying ETFs or funds in which the Fund may invest may be subject to the following principal risks: **Debt Instrument Risk:** The value of debt instruments may increase or decrease as a result of the following: market fluctuations; changes in interest rates; actual or perceived inability of issuers, guarantors, or liquidity providers to make scheduled principal or interest payments; or illiquidity in debt securities markets. In general, rising interest rates lead to a decline in the value of debt securities and debt securities with longer durations tend to be more sensitive to interest rate changes. **Asset-Backed Securities Risk:** Investors in asset-backed securities, including residential mortgage-backed securities and commercial mortgage-backed securities, generally receive payments that are part interest and part return of principal. These payments may vary based on the rate at which the underlying borrowers pay off their loans. **Mortgage-Backed Securities Risk:** Mortgage-backed securities represent interests in "pools" of mortgages and often involve risks that are different from or potentially more significant than risks associated with other types of debt instruments.
